**Problem Statement Title:** Task Scheduler

**Team Name:** Team Develop

**Team Leader:** Akshtih (1602-22-737-132)

**Team Member:** Koushik(1602-22-737-168)

# Problem Description

---

**Problem Statement:** Task Scheduler

**Problem Description:**

Develop a task scheduling system that organizes your tasks in chronological order.

# Idea | Solution

---

- A web application to be build with user authentication
- The user will have to register first on the app via email
- The user can schedule task with the title,description,due date.
- The user can modify/update the scheduled task any time
- The user can mark the task as completed after completion of task and can delete it later

# Technologies Used

---

- **Backend:** Node.js, Express.js
- **Frontend:** Html, css, Javascript
- **Database:** MongoDB
